

JEE Advanced 2024_26th May 2024 S1

Participant ID	244004220
Participant Name	AASTHA AGRAWAL
Test Center Name	LAKSHMI NARAYAN COLLEGE OF TECHNOLOGY EXCELLENCE
Test Date	26/05/2024
Test Time	9:00 AM - 12:00 PM
Subject	JEE Advanced 2024 Paper 1

Section : Math Sec 1

Q.1

SECTION 1 (Maximum Marks: 12)

- This section contains **FOUR (04)** questions.
 - Each question has **FOUR** options (A), (B), (C) and (D). **ONLY ONE** of these four options is the correct answer.
 - For each question, choose the option corresponding to the correct answer.
 - Answer to each question will be evaluated according to the following marking scheme:
- Full Marks : +3 If ONLY the correct option is chosen;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : -1 In all other cases.*

Let $\frac{\pi}{2} < x < \pi$ be such that $\cot x = \frac{-5}{\sqrt{11}}$. Then

$$\left(\sin \frac{11x}{2}\right)(\sin 6x - \cos 6x) + \left(\cos \frac{11x}{2}\right)(\sin 6x + \cos 6x)$$

is equal to

Options

A. $\frac{\sqrt{11}-1}{3\sqrt{2}}$

B. $\frac{\sqrt{11}-1}{2\sqrt{3}}$

C. $\frac{\sqrt{11}+1}{3\sqrt{2}}$

D. $\frac{\sqrt{11}+1}{2\sqrt{3}}$

Question Type : MCQ

Question ID : 618074258

Chosen Option : D

Q.2

SECTION 1 (Maximum Marks: 12)

- This section contains **FOUR (04)** questions.
- Each question has **FOUR** options (A), (B), (C) and (D). **ONLY ONE** of these four options is the correct answer.
- For each question, choose the option corresponding to the correct answer.
- Answer to each question will be evaluated according to the following marking scheme:
Full Marks : +3 If ONLY the correct option is chosen;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : -1 In all other cases.

A student appears for a quiz consisting of only true-false type questions and answers all the questions. The student knows the answers of some questions and guesses the answers for the remaining questions. Whenever the student knows the answer of a question, he gives the correct answer. Assume that the probability of the student giving the correct answer for a question, given that he has guessed it, is $\frac{1}{2}$. Also assume that the probability of the answer for a question being guessed, given that the student's answer is correct, is $\frac{1}{6}$. Then the probability that the student knows the answer of a randomly chosen question is

Options

A. $\frac{5}{7}$

B. $\frac{1}{12}$

C. $\frac{1}{7}$

D. $\frac{5}{12}$

Question Type : **MCQ**

Question ID : **618074257**

Chosen Option : --

Q.3

SECTION 1 (Maximum Marks: 12)

- This section contains **FOUR (04)** questions.
- Each question has **FOUR** options (A), (B), (C) and (D). **ONLY ONE** of these four options is the correct answer.
- For each question, choose the option corresponding to the correct answer.
- Answer to each question will be evaluated according to the following marking scheme:
 Full Marks : +3 If **ONLY** the correct option is chosen;
 Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
 Negative Marks : -1 In all other cases.

Let $f(x)$ be a continuously differentiable function on the interval $(0, \infty)$ such that $f(1) = 2$ and

$$\lim_{t \rightarrow x} \frac{t^{10}f(x) - x^{10}f(t)}{t^9 - x^9} = 1$$

for each $x > 0$. Then, for all $x > 0$, $f(x)$ is equal to

Options A. $\frac{-9}{11x} + \frac{31}{11}x^{10}$

B. $\frac{31}{11x} - \frac{9}{11}x^{10}$

C. $\frac{13}{11x} + \frac{9}{11}x^{10}$

D. $\frac{9}{11x} + \frac{13}{11}x^{10}$

Question Type : MCQ

Question ID : 618074256

Chosen Option : D

Q.4

SECTION 1 (Maximum Marks: 12)

- This section contains **FOUR (04)** questions.
- Each question has **FOUR** options (A), (B), (C) and (D). **ONLY ONE** of these four options is the correct answer.
- For each question, choose the option corresponding to the correct answer.
- Answer to each question will be evaluated according to the following marking scheme:
 Full Marks : +3 If **ONLY** the correct option is chosen;
 Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
 Negative Marks : -1 In all other cases.

Consider the ellipse $\frac{x^2}{9} + \frac{y^2}{4} = 1$. Let $S(p, q)$ be a point in the first quadrant such that

$\frac{p^2}{9} + \frac{q^2}{4} > 1$. Two tangents are drawn from S to the ellipse, of which one meets the ellipse at one end point of the minor axis and the other meets the ellipse at a point T in the fourth quadrant. Let R be the vertex of the ellipse with positive x -coordinate and O be the center of the ellipse. If the area of the triangle ΔORT is $\frac{3}{2}$, then which of the following options is correct?

Options A. $q = 2, p = 3\sqrt{3}$

B. $q = 2, p = 4\sqrt{3}$

C. $q = 1, p = 6\sqrt{3}$

D. $q = 1, p = 5\sqrt{3}$

Question Type : MCQ

Question ID : 618074259

Chosen Option : --

Q.1

SECTION 2 (Maximum Marks: 12)

- This section contains **THREE (03)** questions.
 - Each question has **FOUR** options (A), (B), (C) and (D). **ONE OR MORE THAN ONE** of these four option(s) is(are) correct answer(s).
 - For each question, choose the option(s) corresponding to (all) the correct answer(s).
 - Answer to each question will be evaluated according to the following marking scheme:
- Full Marks : +4 ONLY if (all) the correct option(s) is(are) chosen;*
Partial Marks : +3 If all the four options are correct but ONLY three options are chosen;
Partial Marks : +2 If three or more options are correct but ONLY two options are chosen, both of which are correct;
Partial Marks : +1 If two or more options are correct but ONLY one option is chosen and it is a correct option;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : -2 In all other cases.
- For example, in a question, if (A), (B) and (D) are the ONLY three options corresponding to correct answers, then
 choosing ONLY (A), (B) and (D) will get +4 marks;
 choosing ONLY (A) and (B) will get +2 marks;
 choosing ONLY (A) and (D) will get +2 marks;
 choosing ONLY (B) and (D) will get +2 marks;
 choosing ONLY (A) will get +1 mark;
 choosing ONLY (B) will get +1 mark;
 choosing ONLY (D) will get +1 mark;
 choosing no option (i.e. the question is unanswered) will get 0 marks; and
 choosing any other combination of options will get -2 marks.

Let \mathbb{R}^2 denote $\mathbb{R} \times \mathbb{R}$. Let

$$S = \{(a, b, c) : a, b, c \in \mathbb{R} \text{ and } ax^2 + 2bxy + cy^2 > 0 \text{ for all } (x, y) \in \mathbb{R}^2 - \{(0, 0)\}\}.$$

Then which of the following statements is (are) TRUE?

Options For any given $(a, b, c) \in S$, the system of linear equations

A.

$$\begin{aligned} ax + by &= 1 \\ bx + cy &= -1 \end{aligned}$$

has a unique solution.

B. If $\left(3, b, \frac{1}{12}\right) \in S$, then $|2b| < 1$.

For any given $(a, b, c) \in S$, the system of linear equations

C.

$$\begin{aligned} (a+1)x + by &= 0 \\ bx + (c+1)y &= 0 \end{aligned}$$

has a unique solution.

D. $\left(2, \frac{7}{2}, 6\right) \in S$

Question Type : **MSQ**

Question ID : **618074261**

Chosen Option : --

Q.2

SECTION 2 (Maximum Marks: 12)

- This section contains **THREE (03)** questions.
- Each question has **FOUR** options (A), (B), (C) and (D). **ONE OR MORE THAN ONE** of these four option(s) is(are) correct answer(s).
- For each question, choose the option(s) corresponding to (all) the correct answer(s).
- Answer to each question will be evaluated according to the following marking scheme:

Full Marks : +4 **ONLY** if (all) the correct option(s) is(are) chosen;

Partial Marks : +3 If all the four options are correct but **ONLY** three options are chosen;

Partial Marks : +2 If three or more options are correct but **ONLY** two options are chosen, both of which are correct;

Partial Marks : +1 If two or more options are correct but **ONLY** one option is chosen and it is a correct option;

Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);

Negative Marks : -2 In all other cases.
- For example, in a question, if (A), (B) and (D) are the **ONLY** three options corresponding to correct answers, then
 choosing ONLY (A), (B) and (D) will get +4 marks;
 choosing ONLY (A) and (B) will get +2 marks;
 choosing ONLY (A) and (D) will get +2 marks;
 choosing ONLY (B) and (D) will get +2 marks;
 choosing ONLY (A) will get +1 mark;
 choosing ONLY (B) will get +1 mark;
 choosing ONLY (D) will get +1 mark;
 choosing no option (i.e. the question is unanswered) will get 0 marks; and
 choosing any other combination of options will get -2 marks.

Let $S = \{a + b\sqrt{2} : a, b \in \mathbb{Z}\}$, $T_1 = \left\{(-1 + \sqrt{2})^n : n \in \mathbb{N}\right\}$, and $T_2 = \left\{(1 + \sqrt{2})^n : n \in \mathbb{N}\right\}$.

Then which of the following statements is (are) TRUE?

Options A.

For any given $a, b \in \mathbb{Z}$, $\cos(\pi(a + b\sqrt{2})) + i\sin(\pi(a + b\sqrt{2})) \in \mathbb{Z}$ if and only if $b = 0$, where $i = \sqrt{-1}$.

- B. $T_1 \cap \left(0, \frac{1}{2024}\right) = \emptyset$, where \emptyset denotes the empty set.
- C. $\mathbb{Z} \cup T_1 \cup T_2 \subset S$
- D. $T_2 \cap (2024, \infty) \neq \emptyset$

Question Type : **MSQ**

Question ID : **618074260**

Chosen Option : --

Q.3

SECTION 2 (Maximum Marks: 12)

- This section contains **THREE (03)** questions.
 - Each question has **FOUR** options (A), (B), (C) and (D). **ONE OR MORE THAN ONE** of these four option(s) is(are) correct answer(s).
 - For each question, choose the option(s) corresponding to (all) the correct answer(s).
 - Answer to each question will be evaluated according to the following marking scheme:
- Full Marks** : +4 **ONLY** if (all) the correct option(s) is(are) chosen;
Partial Marks : +3 If all the four options are correct but **ONLY** three options are chosen;
Partial Marks : +2 If three or more options are correct but **ONLY** two options are chosen, both of which are correct;
Partial Marks : +1 If two or more options are correct but **ONLY** one option is chosen and it is a correct option;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : -2 In all other cases.
- For example, in a question, if (A), (B) and (D) are the **ONLY** three options corresponding to correct answers, then
choosing ONLY (A), (B) and (D) will get +4 marks;
choosing ONLY (A) and (B) will get +2 marks;
choosing ONLY (A) and (D) will get +2 marks;
choosing ONLY (B) and (D) will get +2 marks;
choosing ONLY (A) will get +1 mark;
choosing ONLY (B) will get +1 mark;
choosing ONLY (D) will get +1 mark;
choosing no option (i.e. the question is unanswered) will get 0 marks; and
choosing any other combination of options will get -2 marks.

Let \mathbb{R}^3 denote the three-dimensional space. Take two points $P = (1, 2, 3)$ and $Q = (4, 2, 7)$. Let $dist(X, Y)$ denote the distance between two points X and Y in \mathbb{R}^3 . Let

$$S = \left\{ X \in \mathbb{R}^3 : (dist(X, P))^2 - (dist(X, Q))^2 = 50 \right\} \text{ and}$$

$$T = \left\{ Y \in \mathbb{R}^3 : (dist(Y, Q))^2 - (dist(Y, P))^2 = 50 \right\}.$$

Then which of the following statements is (are) TRUE?

Options A.

A. There is a square of perimeter 48, two of whose vertices are from S and the other two vertices are from T .

B.

There are infinitely many rectangles of perimeter 48, two of whose vertices are from S and the other two vertices are from T .

C.

There is a triangle whose area is 1 and all of whose vertices are from S .

D.

There are two distinct points L and M in T such that each point on the line segment LM is also in T .

Chosen Option : --

Section : Math Sec 3

Q.1

SECTION 3 (Maximum Marks: 24)

- This section contains **SIX (06)** questions.
- The answer to each question is a **NON-NEGATIVE INTEGER**.
- For each question, enter the correct integer corresponding to the answer using the mouse and the on-screen virtual numeric keypad in the place designated to enter the answer.
- Answer to each question will be evaluated according to the following marking scheme:
 Full Marks : +4 If **ONLY** the correct integer is entered;
 Zero Marks : 0 In all other cases.

Let $\overrightarrow{OP} = \frac{\alpha-1}{\alpha}\hat{i} + \hat{j} + \hat{k}$, $\overrightarrow{OQ} = \hat{i} + \frac{\beta-1}{\beta}\hat{j} + \hat{k}$ and $\overrightarrow{OR} = \hat{i} + \hat{j} + \frac{1}{2}\hat{k}$ be three vectors, where

$\alpha, \beta \in \mathbb{R} - \{0\}$ and O denotes the origin. If $(\overrightarrow{OP} \times \overrightarrow{OQ}) \cdot \overrightarrow{OR} = 0$ and the point $(\alpha, \beta, 2)$ lies on the plane $3x + 3y - z + l = 0$, then the value of l is _____.

Q.3

SECTION 3 (Maximum Marks: 24)

- This section contains **SIX (06)** questions.
- The answer to each question is a **NON-NEGATIVE INTEGER**.
- For each question, enter the correct integer corresponding to the answer using the mouse and the on-screen virtual numeric keypad in the place designated to enter the answer.
- Answer to each question will be evaluated according to the following marking scheme:
 Full Marks : +4 If **ONLY** the correct integer is entered;
 Zero Marks : 0 In all other cases.

Let $f(x) = x^4 + ax^3 + bx^2 + c$ be a polynomial with real coefficients such that $f(1) = -9$. Suppose that $i\sqrt{3}$ is a root of the equation $4x^3 + 3ax^2 + 2bx = 0$, where $i = \sqrt{-1}$. If $\alpha_1, \alpha_2, \alpha_3$, and α_4 are all the roots of the equation $f(x) = 0$, then $|\alpha_1|^2 + |\alpha_2|^2 + |\alpha_3|^2 + |\alpha_4|^2$ is equal to _____.

Given --

Answer :

Question Type : **SA**

Question ID : **618074264**

Q.4

SECTION 3 (Maximum Marks: 24)

- This section contains **SIX (06)** questions.
- The answer to each question is a **NON-NEGATIVE INTEGER**.
- For each question, enter the correct integer corresponding to the answer using the mouse and the on-screen virtual numeric keypad in the place designated to enter the answer.
- Answer to each question will be evaluated according to the following marking scheme:
Full Marks : +4 If ONLY the correct integer is entered;
Zero Marks : 0 In all other cases.

Let $a = 3\sqrt{2}$ and $b = \frac{1}{5^{1/6}\sqrt{6}}$. If $x, y \in \mathbb{R}$ are such that

$$3x + 2y = \log_a(18)^{\frac{5}{4}} \quad \text{and} \\ 2x - y = \log_b(\sqrt{1080}),$$

then $4x + 5y$ is equal to _____.

Q.1

SECTION 4 (Maximum Marks: 12)

- This section contains **FOUR (04)** Matching List Sets.
 - Each set has **ONE** Multiple Choice Question.
 - Each set has **TWO** lists: **List-I** and **List-II**.
 - List-I** has **Four** entries (P), (Q), (R) and (S) and **List-II** has **Five** entries (1), (2), (3), (4) and (5).
 - FOUR** options are given in each Multiple Choice Question based on **List-I** and **List-II** and **ONLY ONE** of these four options satisfies the condition asked in the Multiple Choice Question.
 - Answer to each question will be evaluated according to the following marking scheme:
- Full Marks** : +3 **ONLY** if the option corresponding to the correct combination is chosen;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : -1 In all other cases.

Let $\gamma \in \mathbb{R}$ be such that the lines $L_1 : \frac{x+11}{1} = \frac{y+21}{2} = \frac{z+29}{3}$ and $L_2 : \frac{x+16}{3} = \frac{y+11}{2} = \frac{z+4}{\gamma}$

intersect. Let R_i be the point of intersection of L_1 and L_2 . Let $O = (0, 0, 0)$, and \hat{n} denote a unit normal vector to the plane containing both the lines L_1 and L_2 .

Match each entry in **List-I** to the correct entry in **List-II**.

List-I(P) γ equals(Q) A possible choice for \hat{n} is(R) $\overrightarrow{OR_i}$ equals(S) A possible value of $\overrightarrow{OR_i} \cdot \hat{n}$ is**List-II**(1) $-\hat{i} - \hat{j} + \hat{k}$ (2) $\sqrt{\frac{3}{2}}$

(3) 1

(4) $\frac{1}{\sqrt{6}}\hat{i} - \frac{2}{\sqrt{6}}\hat{j} + \frac{1}{\sqrt{6}}\hat{k}$ (5) $\sqrt{\frac{2}{3}}$

The correct option is

- Options**
- A. (P) \rightarrow (5) (Q) \rightarrow (4) (R) \rightarrow (1) (S) \rightarrow (2)
B. (P) \rightarrow (3) (Q) \rightarrow (4) (R) \rightarrow (1) (S) \rightarrow (5)
C. (P) \rightarrow (3) (Q) \rightarrow (4) (R) \rightarrow (1) (S) \rightarrow (2)
D. (P) \rightarrow (3) (Q) \rightarrow (1) (R) \rightarrow (4) (S) \rightarrow (5)

Question Type : MCQ

Question ID : 618074271

Chosen Option : B

Q.2

SECTION 4 (Maximum Marks: 12)

- This section contains **FOUR (04)** Matching List Sets.
 - Each set has **ONE** Multiple Choice Question.
 - Each set has **TWO** lists: **List-I** and **List-II**.
 - List-I** has **Four** entries (P), (Q), (R) and (S) and **List-II** has **Five** entries (1), (2), (3), (4) and (5).
 - FOUR** options are given in each Multiple Choice Question based on **List-I** and **List-II** and **ONLY ONE** of these four options satisfies the condition asked in the Multiple Choice Question.
 - Answer to each question will be evaluated according to the following marking scheme:
- Full Marks** : +3 **ONLY** if the option corresponding to the correct combination is chosen;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : -1 In all other cases.

Let α and β be the distinct roots of the equation $x^2 + x - 1 = 0$. Consider the set $T = \{1, \alpha, \beta\}$.

For a 3×3 matrix $M = (a_{ij})_{3 \times 3}$, define $R_i = a_{i1} + a_{i2} + a_{i3}$ and $C_j = a_{1j} + a_{2j} + a_{3j}$ for $i = 1, 2, 3$ and $j = 1, 2, 3$.

Match each entry in **List-I** to the correct entry in **List-II**.

List-I

(P) The number of matrices $M = (a_{ij})_{3 \times 3}$ with all entries in T such that $R_i = C_j = 0$ for all i, j , is

List-II

(1) 1

(Q) The number of symmetric matrices $M = (a_{ij})_{3 \times 3}$ with all entries in T such that $C_j = 0$ for all j , is

(2) 12

(R) Let $M = (a_{ij})_{3 \times 3}$ be a skew symmetric matrix such that $a_{ij} \in T$ for $i > j$. Then the number of elements in the set $\left\{ \begin{pmatrix} x \\ y \\ z \end{pmatrix} : x, y, z \in \mathbb{R}, M \begin{pmatrix} x \\ y \\ z \end{pmatrix} = \begin{pmatrix} a_{12} \\ 0 \\ -a_{23} \end{pmatrix} \right\}$ is

(3) infinite

(S) Let $M = (a_{ij})_{3 \times 3}$ be a matrix with all entries in T such that $R_i = 0$ for all i . Then the absolute value of the determinant of M is

(4) 6

(5) 0

The correct option is

- Options A. (P) → (4) (Q) → (2) (R) → (5) (S) → (1)
 B. (P) → (1) (Q) → (5) (R) → (3) (S) → (4)
 C. (P) → (2) (Q) → (4) (R) → (3) (S) → (5)
 D. (P) → (2) (Q) → (4) (R) → (1) (S) → (5)

Question ID : 618074269

Chosen Option : --

Q.3

SECTION 4 (Maximum Marks: 12)

- This section contains **FOUR (04)** Matching List Sets.
- Each set has **ONE** Multiple Choice Question.
- Each set has **TWO** lists: **List-I** and **List-II**.
- **List-I** has **Four** entries (P), (Q), (R) and (S) and **List-II** has **Five** entries (1), (2), (3), (4) and (5).
- **FOUR** options are given in each Multiple Choice Question based on **List-I** and **List-II** and **ONLY ONE** of these four options satisfies the condition asked in the Multiple Choice Question.
- Answer to each question will be evaluated according to the following marking scheme:
Full Marks : +3 ONLY if the option corresponding to the correct combination is chosen;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : -1 In all other cases.

Let the straight line $y = 2x$ touch a circle with center $(0, \alpha)$, $\alpha > 0$, and radius r at a point A_1 .

Let B_1 be the point on the circle such that the line segment A_1B_1 is a diameter of the circle. Let $\alpha + r = 5 + \sqrt{5}$.

Match each entry in **List-I** to the correct entry in **List-II**.

List-I	List-II
(P) α equals	(1) $(-2, 4)$
(Q) r equals	(2) $\sqrt{5}$
(R) A_1 equals	(3) $(-2, 6)$
(S) B_1 equals	(4) 5 (5) $(2, 4)$

The correct option is

- Options**
- A. (P) \rightarrow (2) (Q) \rightarrow (4) (R) \rightarrow (3) (S) \rightarrow (5)
 - B. (P) \rightarrow (4) (Q) \rightarrow (2) (R) \rightarrow (1) (S) \rightarrow (3)
 - C. (P) \rightarrow (4) (Q) \rightarrow (2) (R) \rightarrow (5) (S) \rightarrow (3)
 - D. (P) \rightarrow (2) (Q) \rightarrow (4) (R) \rightarrow (1) (S) \rightarrow (3)

 - List-I** has **Four** entries (P), (Q), (R) and (S) and **List-II** has **Five** entries (1), (2), (3), (4) and (5).
 - FOUR** options are given in each Multiple Choice Question based on **List-I** and **List-II** and **ONLY ONE** of these four options satisfies the condition asked in the Multiple Choice Question.
 - Answer to each question will be evaluated according to the following marking scheme:
- Full Marks** : +3 **ONLY** if the option corresponding to the correct combination is chosen;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : -1 In all other cases.

Let $f: \mathbb{R} \rightarrow \mathbb{R}$ and $g: \mathbb{R} \rightarrow \mathbb{R}$ be functions defined by

$$f(x) = \begin{cases} x|x| \sin\left(\frac{1}{x}\right), & x \neq 0, \\ 0, & x = 0, \end{cases} \quad \text{and} \quad g(x) = \begin{cases} 1-2x, & 0 \leq x \leq \frac{1}{2}, \\ 0, & \text{otherwise}. \end{cases}$$

Let $a, b, c, d \in \mathbb{R}$. Define the function $h: \mathbb{R} \rightarrow \mathbb{R}$ by

$$h(x) = a f(x) + b \left(g(x) + g\left(\frac{1}{2}-x\right) \right) + c(x-g(x)) + d g(x), \quad x \in \mathbb{R}.$$

Match each entry in **List-I** to the correct entry in **List-II**.

List-I

- (P) If $a = 0, b = 1, c = 0$, and $d = 0$, then
(Q) If $a = 1, b = 0, c = 0$, and $d = 0$, then
(R) If $a = 0, b = 0, c = 1$, and $d = 0$, then
(S) If $a = 0, b = 0, c = 0$, and $d = 1$, then

List-II

- (1) h is one-one.
(2) h is onto.
(3) h is differentiable on \mathbb{R} .
(4) the range of h is $[0,1]$.
(5) the range of h is $\{0,1\}$.

The correct option is

- Options**
- | | | | |
|--------------------------|-----------------------|-----------------------|-----------------------|
| A. (P) \rightarrow (4) | (Q) \rightarrow (2) | (R) \rightarrow (1) | (S) \rightarrow (3) |
| B. (P) \rightarrow (4) | (Q) \rightarrow (3) | (R) \rightarrow (1) | (S) \rightarrow (2) |
| C. (P) \rightarrow (5) | (Q) \rightarrow (3) | (R) \rightarrow (2) | (S) \rightarrow (4) |
| D. (P) \rightarrow (5) | (Q) \rightarrow (2) | (R) \rightarrow (4) | (S) \rightarrow (3) |

SECTION 1 (Maximum Marks: 12)

- This section contains **FOUR (04)** questions.
- Each question has **FOUR** options (A), (B), (C) and (D). **ONLY ONE** of these four options is the correct answer.
- For each question, choose the option corresponding to the correct answer.
- Answer to each question will be evaluated according to the following marking scheme:
 Full Marks : +3 If **ONLY** the correct option is chosen;
 Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
 Negative Marks : -1 In all other cases.

An infinitely long wire, located on the z -axis, carries a current I along the $+z$ -direction and produces the magnetic field \vec{B} . The magnitude of the line integral $\int \vec{B} \cdot d\vec{l}$ along a straight line from the point $(-\sqrt{3}a, a, 0)$ to $(a, a, 0)$ is given by

[μ_0 is the magnetic permeability of free space.]

Options A. $7\mu_0I/24$

B. $\mu_0I/6$

C. $\mu_0I/8$

D. $7\mu_0I/12$

SECTION 2 (Maximum Marks: 12)

- This section contains **THREE (03)** questions.
- Each question has **FOUR** options (A), (B), (C) and (D). **ONE OR MORE THAN ONE** of these four option(s) is(are) correct answer(s).
- For each question, choose the option(s) corresponding to (all) the correct answer(s).
- Answer to each question will be evaluated according to the following marking scheme:

Full Marks : +4 **ONLY** if (all) the correct option(s) is(are) chosen;
Partial Marks : +3 If all the four options are correct but **ONLY** three options are chosen;
Partial Marks : +2 If three or more options are correct but **ONLY** two options are chosen, both of which are correct;
Partial Marks : +1 If two or more options are correct but **ONLY** one option is chosen and it is a correct option;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : -2 In all other cases.

- For example, in a question, if (A), (B) and (D) are the **ONLY** three options corresponding to correct answers, then
 choosing **ONLY** (A), (B) and (D) will get +4 marks;
 choosing **ONLY** (A) and (B) will get +2 marks;
 choosing **ONLY** (A) and (D) will get +2 marks;
 choosing **ONLY** (B) and (D) will get +2 marks;
 choosing **ONLY** (A) will get +1 mark;
 choosing **ONLY** (B) will get +1 mark;
 choosing **ONLY** (D) will get +1 mark;
 choosing no option (i.e. the question is unanswered) will get 0 marks; and
 choosing any other combination of options will get -2 marks.

A glass beaker has a solid, plano-convex base of refractive index 1.60, as shown in the figure. The radius of curvature of the convex surface (SPU) is 9 cm, while the planar surface (STU) acts as a mirror. This beaker is filled with a liquid of refractive index n up to the level QPR. If the image of a point object O at a height of h (OT in the figure) is formed onto itself, then, which of the following option(s) is(are) correct?

- Options**
- A. For $n = 1.48$, $h = 85$ cm.
 - B. For $n = 1.42$, $h = 50$ cm.
 - C. For $n = 1.35$, $h = 36$ cm.
 - D. For $n = 1.45$, $h = 65$ cm.

 - choosing any other combination of options will get -2 marks.

Two uniform strings of mass per unit length μ and 4μ , and length L and $2L$, respectively, are joined at point O, and tied at two fixed ends P and Q, as shown in the figure. The strings are under a uniform tension T . If we define the frequency $v_0 = \frac{1}{2L} \sqrt{\frac{T}{\mu}}$, which of the following statement(s) is(are) correct?

**Options A.**

When the composite string vibrates at the minimum frequency with a node at O, it has 6 nodes, **including the end nodes**.

B.

With an antinode at O, the minimum frequency of vibration of the composite string is $2v_0$.

C.

With a node at O, the minimum frequency of vibration of the composite string is v_0 .

D.

No vibrational mode with an antinode at O is possible for the composite string.

A particle of mass m is moving in a circular orbit under the influence of the central force $F(r) = -kr$, corresponding to the potential energy $V(r) = kr^2/2$, where k is a positive force constant and r is the radial distance from the origin. According to the Bohr's quantization rule, the angular momentum of the particle is given by $L = nh$, where $\hbar = h/(2\pi)$, h is the Planck's constant, and n a positive integer. If v and E are the speed and total energy of the particle, respectively, then which of the following expression(s) is(are) correct?

Options

A. $v^2 = n\hbar \sqrt{\frac{k}{m^3}}$

B. $\frac{L}{mr^2} = \sqrt{\frac{k}{m}}$

C. $E = \frac{n\hbar}{2} \sqrt{\frac{k}{m}}$

D. $r^2 = n\hbar \sqrt{\frac{1}{mk}}$

Q.2

SECTION 4 (Maximum Marks: 12)

- This section contains **FOUR (04)** Matching List Sets.
 - Each set has **ONE** Multiple Choice Question.
 - Each set has **TWO** lists: **List-I** and **List-II**.
 - List-I** has **Four** entries (P), (Q), (R) and (S) and **List-II** has **Five** entries (1), (2), (3), (4) and (5).
 - FOUR** options are given in each Multiple Choice Question based on **List-I** and **List-II** and **ONLY ONE** of these four options satisfies the condition asked in the Multiple Choice Question.
 - Answer to each question will be evaluated according to the following marking scheme:
- Full Marks** : +3 **ONLY** if the option corresponding to the correct combination is chosen;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : -1 In all other cases.

The circuit shown in the figure contains an inductor L , a capacitor C_0 , a resistor R_0 and an ideal battery. The circuit also contains two keys K_1 and K_2 . Initially, both the keys are open and there is no charge on the capacitor. At an instant, key K_1 is closed and immediately after this the current in R_0 is found to be I_1 . After a long time, the current attains a steady state value I_2 . Thereafter, K_2 is closed and simultaneously K_1 is opened and the voltage across C_0 oscillates with amplitude V_0 and angular frequency ω_0 .

Match the quantities mentioned in List-I with their values in List-II and choose the correct option.

- | List-I | List-II |
|--|----------------|
| (P) The value of I_1 in Ampere is | (1) 0 |
| (Q) The value of I_2 in Ampere is | (2) 2 |
| (R) The value of ω_0 in kilo-radians/s is | (3) 4 |
| (S) The value of V_0 in Volt is | (4) 20 |
| | (5) 200 |

- Options**
- A. P → 1; Q → 2; R → 3; S → 5
 - B. P → 1; Q → 3; R → 2; S → 5
 - C. P → 2; Q → 5; R → 3; S → 4
 - D. P → 1; Q → 3; R → 2; S → 4

- Each set has **ONE** Multiple Choice Question.
- Each set has **TWO** lists: **List-I** and **List-II**.
- **List-I** has **Four** entries (P), (Q), (R) and (S) and **List-II** has **Five** entries (1), (2), (3), (4) and (5).
- **FOUR** options are given in each Multiple Choice Question based on **List-I** and **List-II** and **ONLY ONE** of these four options satisfies the condition asked in the Multiple Choice Question.
- Answer to each question will be evaluated according to the following marking scheme:
 Full Marks : +3 **ONLY** if the option corresponding to the correct combination is chosen;
 Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
 Negative Marks : -1 In all other cases.

A light ray is incident on the surface of a sphere of refractive index n at an angle of incidence θ_0 . The ray partially refracts into the sphere with angle of refraction ϕ_0 and then partly reflects from the back surface. The reflected ray then emerges out of the sphere after a partial refraction. The total angle of deviation of the emergent ray with respect to the incident ray is α . Match the quantities mentioned in List-I with their values in List-II and choose the correct option.

List-I

- (P) If $n = 2$ and $\alpha = 180^\circ$, then all the possible values of θ_0 will be
 (Q) If $n = \sqrt{3}$ and $\alpha = 180^\circ$, then all the possible values of θ_0 will be
 (R) If $n = \sqrt{3}$ and $\alpha = 180^\circ$, then all the possible values of ϕ_0 will be
 (S) If $n = \sqrt{2}$ and $\theta_0 = 45^\circ$, then all the possible values of α will be

List-II

- (1) 30° and 0°
 (2) 60° and 0°
 (3) 45° and 0°
 (4) 150°
 (5) 0°

- Options A. P → 5; Q → 1; R → 2; S → 4
 B. P → 5; Q → 2; R → 1; S → 4
 C. P → 3; Q → 2; R → 1; S → 4
 D. P → 3; Q → 1; R → 2; S → 5

 - FOUR** options are given in each Multiple Choice Question based on **List-I** and **List-II** and **ONLY ONE** of these four options satisfies the condition asked in the Multiple Choice Question.
 - Answer to each question will be evaluated according to the following marking scheme:
- Full Marks** : +3 **ONLY** if the option corresponding to the correct combination is chosen;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : -1 In all other cases.

One mole of a monatomic ideal gas undergoes the cyclic process J → K → L → M → J, as shown in the P-T diagram.

Match the quantities mentioned in List-I with their values in List-II and choose the correct option.

[R is the gas constant.]

List-I

- (P) Work done in the complete cyclic process
 (Q) Change in the internal energy of the gas in the process JK
 (R) Heat given to the gas in the process KL
 (S) Change in the internal energy of the gas in the process MJ

List-II

- (1) $RT_0 - 4RT_0 \ln 2$
 (2) 0
 (3) $3RT_0$
 (4) $-2RT_0 \ln 2$
 (5) $-3RT_0 \ln 2$

- Options**
- A. P → 4; Q → 1; R → 2; S → 2
 B. P → 1; Q → 3; R → 5; S → 4
 C. P → 2; Q → 5; R → 3; S → 4
 D. P → 4; Q → 3; R → 5; S → 2

Question Type : MCQ

Question ID : 618074286

Chosen Option : D

Q.1

SECTION 1 (Maximum Marks: 12)

- This section contains **FOUR (04)** questions.
- Each question has **FOUR** options (A), (B), (C) and (D). **ONLY ONE** of these four options is the correct answer.
- For each question, choose the option corresponding to the correct answer.
- Answer to each question will be evaluated according to the following marking scheme:
Full Marks : +3 If ONLY the correct option is chosen;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : -1 In all other cases.

Among the following options, select the option in which each complex in Set-I shows geometrical isomerism and the two complexes in Set-II are ionization isomers of each other.

- Options**
- A. **Set-I:** $[\text{Cr}(\text{NH}_3)_5\text{Cl}]\text{Cl}_2$ and $[\text{Co}(\text{en})(\text{NH}_3)_2\text{Cl}_2]$
Set-II: $[\text{Cr}(\text{H}_2\text{O})_6]\text{Cl}_3$ and $[\text{Cr}(\text{H}_2\text{O})_5\text{Cl}]\text{Cl}_2 \cdot \text{H}_2\text{O}$
- B. **Set-I:** $[\text{Ni}(\text{CO})_4]$ and $[\text{PdCl}_2(\text{PPh}_3)_2]$
Set-II: $[\text{Co}(\text{NH}_3)_5\text{Cl}]\text{SO}_4$ and $[\text{Co}(\text{NH}_3)_5(\text{SO}_4)]\text{Cl}$
- C. **Set-I:** $[\text{Co}(\text{en})(\text{NH}_3)_2\text{Cl}_2]$ and $[\text{PdCl}_2(\text{PPh}_3)_2]$
Set-II: $[\text{Co}(\text{NH}_3)_6][\text{Cr}(\text{CN})_6]$ and $[\text{Cr}(\text{NH}_3)_6][\text{Co}(\text{CN})_6]$
- D. **Set-I:** $[\text{Co}(\text{NH}_3)_3(\text{NO}_2)_3]$ and $[\text{Co}(\text{en})_2\text{Cl}_2]$
Set-II: $[\text{Co}(\text{NH}_3)_5\text{Cl}]\text{SO}_4$ and $[\text{Co}(\text{NH}_3)_5(\text{SO}_4)]\text{Cl}$

Question Type : MCQ

Question ID : 618074293

Chosen Option : D

Q.2

SECTION 1 (Maximum Marks: 12)

- This section contains **FOUR (04)** questions.
- Each question has **FOUR** options (A), (B), (C) and (D). **ONLY ONE** of these four options is the correct answer.
- For each question, choose the option corresponding to the correct answer.
- Answer to each question will be evaluated according to the following marking scheme:
Full Marks : +3 If ONLY the correct option is chosen;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : -1 In all other cases.

A closed vessel contains 10 g of an ideal gas X at 300 K, which exerts 2 atm pressure. At the same temperature, 80 g of another ideal gas Y is added to it and the pressure becomes 6 atm. The ratio of root mean square velocities of X and Y at 300 K is

- Options**
- A. 2 : 1

- B. $2\sqrt{2} : \sqrt{3}$
- C. $2\sqrt{2} : 1$
- D. 1 : 2

Question Type : MCQ

Question ID : 618074290

Chosen Option : B

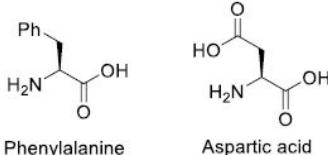

Q.3

SECTION 1 (Maximum Marks: 12)

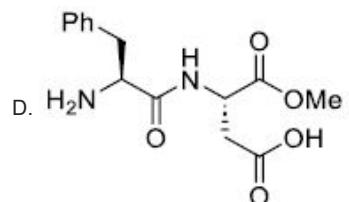

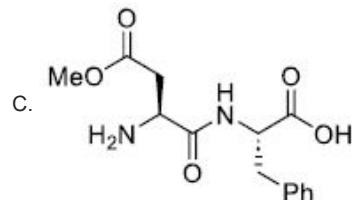

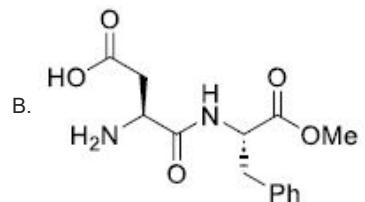

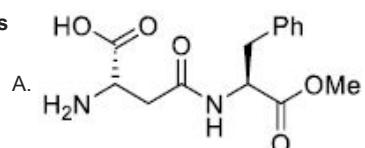

- This section contains **FOUR (04)** questions.
 - Each question has **FOUR** options (A), (B), (C) and (D). **ONLY ONE** of these four options is the correct answer.
 - For each question, choose the option corresponding to the correct answer.
 - Answer to each question will be evaluated according to the following marking scheme:
- Full Marks : +3 If ONLY the correct option is chosen;*
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : -1 In all other cases.

Aspartame, an artificial sweetener, is a dipeptide aspartyl phenylalanine methyl ester. The structure of aspartame is

Structures of phenylalanine and aspartic acid are given below.

Options

Question Type : MCQ

Question ID : 618074292

Chosen Option : B

Q.4

SECTION 1 (Maximum Marks: 12)

- This section contains **FOUR (04)** questions.
- Each question has **FOUR** options (A), (B), (C) and (D). **ONLY ONE** of these four options is the correct answer.
- For each question, choose the option corresponding to the correct answer.
- Answer to each question will be evaluated according to the following marking scheme:
Full Marks : +3 If ONLY the correct option is chosen;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : -1 In all other cases.

At room temperature, disproportionation of an aqueous solution of *in situ* generated nitrous acid

(HNO_2) gives the species

- Options**
- A. H_3O^+ , NO^- and NO_2
 - B. H_3O^+ , NO_3^- and NO_2
 - C. H_3O^+ , NO_3^- and NO
 - D. H_3O^+ , NO_3^- and N_2O

Question Type : MCQ

Question ID : 618074291

Chosen Option : C

Section : Chem Sec 2

Q.1

SECTION 2 (Maximum Marks: 12)

- This section contains **THREE (03)** questions.
- Each question has **FOUR** options (A), (B), (C) and (D). **ONE OR MORE THAN ONE** of these four option(s) is(are) correct answer(s).
- For each question, choose the option(s) corresponding to (all) the correct answer(s).
- Answer to each question will be evaluated according to the following marking scheme:
Full Marks : +4 ONLY if (all) the correct option(s) is(are) chosen;
Partial Marks : +3 If all the four options are correct but ONLY three options are chosen;
Partial Marks : +2 If three or more options are correct but ONLY two options are chosen, both of which are correct;
Partial Marks : +1 If two or more options are correct but ONLY one option is chosen and it is a correct option;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : -2 In all other cases.
- For example, in a question, if (A), (B) and (D) are the ONLY three options corresponding to correct answers, then
choosing ONLY (A), (B) and (D) will get +4 marks;
choosing ONLY (A) and (B) will get +2 marks;
choosing ONLY (A) and (D) will get +2 marks;
choosing ONLY (B) and (D) will get +2 marks;
choosing ONLY (A) will get +1 mark;
choosing ONLY (B) will get +1 mark;
choosing ONLY (D) will get +1 mark;
choosing no option (i.e. the question is unanswered) will get 0 marks; and
choosing any other combination of options will get -2 marks.

The option(s) in which at least three molecules follow Octet Rule is(are)

- Options**
- A. NO_2 , O_3 , HCl and H_2SO_4
 - B. CO_2 , C_2H_4 , NO and HCl
 - C. BCl_3 , NO , NO_2 and H_2SO_4
 - D. CO_2 , BCl_3 , O_3 and C_2H_4

Question Type : MSQ

Question ID : 618074296

Chosen Option : A,B

Q.2

SECTION 2 (Maximum Marks: 12)

- This section contains **THREE (03)** questions.
- Each question has **FOUR** options (A), (B), (C) and (D). **ONE OR MORE THAN ONE** of these four option(s) is(are) correct answer(s).
- For each question, choose the option(s) corresponding to (all) the correct answer(s).
- Answer to each question will be evaluated according to the following marking scheme:
Full Marks : +4 ONLY if (all) the correct option(s) is(are) chosen;
Partial Marks : +3 If all the four options are correct but ONLY three options are chosen;
Partial Marks : +2 If three or more options are correct but ONLY two options are chosen, both of which are correct;
Partial Marks : +1 If two or more options are correct but ONLY one option is chosen and it is a correct option;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : -2 In all other cases.
- For example, in a question, if (A), (B) and (D) are the ONLY three options corresponding to correct answers, then
choosing ONLY (A), (B) and (D) will get +4 marks;
choosing ONLY (A) and (B) will get +2 marks;
choosing ONLY (A) and (D) will get +2 marks;
choosing ONLY (B) and (D) will get +2 marks;
choosing ONLY (A) will get +1 mark;
choosing ONLY (B) will get +1 mark;
choosing ONLY (D) will get +1 mark;
choosing no option (i.e. the question is unanswered) will get 0 marks; and
choosing any other combination of options will get -2 marks.

Among the following, the correct statement(s) for electrons in an atom is(are)

Options A.

The energy of an electron in $2s$ orbital of an atom is lower than the energy of an electron that is infinitely far away from the nucleus.

B.

According to Bohr's model, the magnitude of velocity of electrons increases with increase in values of n .

C.

Uncertainty principle rules out the existence of definite paths for electrons.

D.

According to Bohr's model, the most negative energy value for an electron is given by $n = 1$, which corresponds to the most stable orbit.

Question Type : **MSQ**

Question ID : **618074294**

Chosen Option : **A,D**

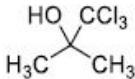

Q.3

SECTION 2 (Maximum Marks: 12)

- This section contains **THREE (03)** questions.
 - Each question has **FOUR** options (A), (B), (C) and (D). **ONE OR MORE THAN ONE** of these four option(s) is(are) correct answer(s).
 - For each question, choose the option(s) corresponding to (all) the correct answer(s).
 - Answer to each question will be evaluated according to the following marking scheme:
- Full Marks** : +4 **ONLY** if (all) the correct option(s) is(are) chosen;
Partial Marks : +3 If all the four options are correct but **ONLY** three options are chosen;
Partial Marks : +2 If three or more options are correct but **ONLY** two options are chosen, both of which are correct;
Partial Marks : +1 If two or more options are correct but **ONLY** one option is chosen and it is a correct option;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : -2 In all other cases.
- For example, in a question, if (A), (B) and (D) are the **ONLY** three options corresponding to correct answers, then
 choosing **ONLY** (A), (B) and (D) will get +4 marks;
 choosing **ONLY** (A) and (B) will get +2 marks;
 choosing **ONLY** (A) and (D) will get +2 marks;
 choosing **ONLY** (B) and (D) will get +2 marks;
 choosing **ONLY** (A) will get +1 mark;
 choosing **ONLY** (B) will get +1 mark;
 choosing **ONLY** (D) will get +1 mark;
 choosing no option (i.e. the question is unanswered) will get 0 marks; and
 choosing any other combination of options will get -2 marks.

Reaction of *iso*-propylbenzene with O₂ followed by the treatment with H₃O⁺ forms phenol and a by-product P. Reaction of P with 3 equivalents of Cl₂ gives compound Q. Treatment of Q with Ca(OH)₂ produces compound R and calcium salt S.

The correct statement(s) regarding P, Q, R and S is(are)

- Options**
- A. Reaction of R with O₂ in the presence of light gives phosgene gas
 - B. Reaction of P with R in the presence of KOH followed by acidification gives
- 
- C. S on heating gives P
 - D. Q reacts with aqueous NaOH to produce Cl₃CCH₂OH and Cl₃CCOONa

Question Type : **MSQ**

Question ID : **618074295**

Chosen Option : --

Section : Chem Sec 3

Q.1

SECTION 3 (Maximum Marks: 24)

- This section contains **SIX (06)** questions.
- The answer to each question is a **NON-NEGATIVE INTEGER**.
- For each question, enter the correct integer corresponding to the answer using the mouse and the on-screen virtual numeric keypad in the place designated to enter the answer.
- Answer to each question will be evaluated according to the following marking scheme:
 Full Marks : +4 If **ONLY** the correct integer is entered;
 Zero Marks : 0 In all other cases.

Among the following complexes, the total number of diamagnetic species is _____.

[Given, atomic number: Mn = 25, Fe = 26, Co = 27;

en = $\text{H}_2\text{NCH}_2\text{CH}_2\text{NH}_2$]

Given 1

Answer :

Question Type : **SA**

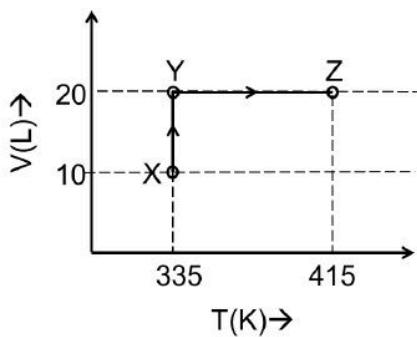

Question ID : **618074302**

Q.2

SECTION 3 (Maximum Marks: 24)

- This section contains **SIX (06)** questions.
- The answer to each question is a **NON-NEGATIVE INTEGER**.
- For each question, enter the correct integer corresponding to the answer using the mouse and the on-screen virtual numeric keypad in the place designated to enter the answer.
- Answer to each question will be evaluated according to the following marking scheme:
 Full Marks : +4 If **ONLY** the correct integer is entered;
 Zero Marks : 0 In all other cases.

Consider the following volume–temperature (V-T) diagram for the expansion of 5 moles of an ideal monoatomic gas.

Considering only P-V work is involved, the total change in enthalpy (in Joule) for the transformation of state in the sequence **X → Y → Z** is _____.

[Use the given data: Molar heat capacity of the gas for the given temperature range, $C_{V,m} = 12 \text{ J K}^{-1} \text{ mol}^{-1}$ and gas constant, $R = 8.3 \text{ J K}^{-1} \text{ mol}^{-1}$]

Given **8120**

Answer :

Question Type : **SA**

Question ID : **618074297**

Q.3

SECTION 3 (Maximum Marks: 24)

- This section contains **SIX (06)** questions.
- The answer to each question is a **NON-NEGATIVE INTEGER**.
- For each question, enter the correct integer corresponding to the answer using the mouse and the on-screen virtual numeric keypad in the place designated to enter the answer.
- Answer to each question will be evaluated according to the following marking scheme:
Full Marks : +4 If ONLY the correct integer is entered;
Zero Marks : 0 In all other cases.

Among $V(CO)_6$, $Cr(CO)_5$, $Cu(CO)_3$, $Mn(CO)_5$, $Fe(CO)_5$, $[Co(CO)_3]^{3-}$, $[Cr(CO)_4]^{4-}$, and $Ir(CO)_3$, the total number of species isoelectronic with $Ni(CO)_4$ is _____.

[Given, atomic number: V = 23, Cr = 24, Mn = 25, Fe = 26, Co = 27, Ni = 28, Cu = 29, Ir = 77]

Given 1

Answer :

Question Type : **SA**

Question ID : **618074300**

Q.4

SECTION 3 (Maximum Marks: 24)

- This section contains **SIX (06)** questions.
- The answer to each question is a **NON-NEGATIVE INTEGER**.
- For each question, enter the correct integer corresponding to the answer using the mouse and the on-screen virtual numeric keypad in the place designated to enter the answer.
- Answer to each question will be evaluated according to the following marking scheme:
Full Marks : +4 If ONLY the correct integer is entered;
Zero Marks : 0 In all other cases.

Complete reaction of acetaldehyde with excess formaldehyde, upon heating with conc. NaOH solution, gives P and Q. Compound P does not give Tollens' test, whereas Q on acidification gives positive Tollens' test. Treatment of P with excess cyclohexanone in the presence of catalytic amount of *p*-toluenesulfonic acid (PTSA) gives product R.

Sum of the number of methylene groups ($-CH_2-$) and oxygen atoms in R is _____.

Given 7

Answer :

Question Type : **SA**

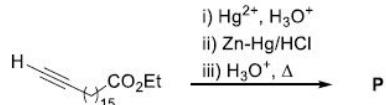

Question ID : **618074299**

Q.5

SECTION 3 (Maximum Marks: 24)

- This section contains **SIX (06)** questions.
- The answer to each question is a **NON-NEGATIVE INTEGER**.
- For each question, enter the correct integer corresponding to the answer using the mouse and the on-screen virtual numeric keypad in the place designated to enter the answer.
- Answer to each question will be evaluated according to the following marking scheme:
 Full Marks : +4 If **ONLY** the correct integer is entered;
 Zero Marks : 0 In all other cases.

In the following reaction sequence, the major product P is formed.

Glycerol reacts completely with excess P in the presence of an acid catalyst to form Q. Reaction of Q with excess NaOH followed by the treatment with CaCl_2 yields Ca-soap R, quantitatively.

Starting with one mole of Q, the amount of R produced in gram is _____.

[Given, atomic weight: H = 1, C = 12, N = 14, O = 16, Na = 23, Cl = 35, Ca = 40]

Given --

Answer :

Question Type : **SA**

Question ID : **618074301**

Q.6

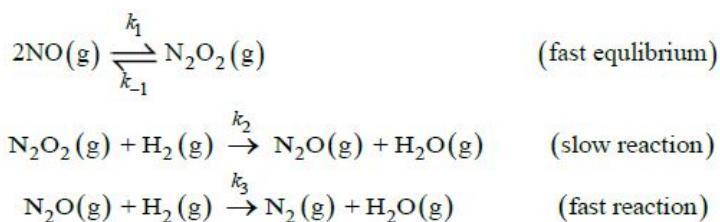

SECTION 3 (Maximum Marks: 24)

- This section contains **SIX (06)** questions.
- The answer to each question is a **NON-NEGATIVE INTEGER**.
- For each question, enter the correct integer corresponding to the answer using the mouse and the on-screen virtual numeric keypad in the place designated to enter the answer.
- Answer to each question will be evaluated according to the following marking scheme:
 Full Marks : +4 If **ONLY** the correct integer is entered;
 Zero Marks : 0 In all other cases.

Consider the following reaction,

which follows the mechanism given below:

The order of the reaction is _____.

Given 2

Answer :

Question Type : **SA**

Question ID : **618074298**

Q.1

SECTION 4 (Maximum Marks: 12)

- This section contains **FOUR (04)** Matching List Sets.
- Each set has **ONE** Multiple Choice Question.
- Each set has **TWO** lists: **List-I** and **List-II**.
- **List-I** has **Four** entries (P), (Q), (R) and (S) and **List-II** has **Five** entries (1), (2), (3), (4) and (5).
- **FOUR** options are given in each Multiple Choice Question based on **List-I** and **List-II** and **ONLY ONE** of these four options satisfies the condition asked in the Multiple Choice Question.
- Answer to each question will be evaluated according to the following marking scheme:
Full Marks : +3 ONLY if the option corresponding to the correct combination is chosen;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : -1 In all other cases.

Based on VSEPR model, match the xenon compounds given in **List-I** with the corresponding geometries and the number of lone pairs on xenon given in **List-II** and choose the correct option.

List-I

- (P) XeF₂
(Q) XeF₄
(R) XeO₃
(S) XeO₃F₂

List-II

- (1) Trigonal bipyramidal and two lone pair of electrons
(2) Tetrahedral and one lone pair of electrons
(3) Octahedral and two lone pair of electrons
(4) Trigonal bipyramidal and no lone pair of electrons
(5) Trigonal bipyramidal and three lone pair of electrons

- Options**
- A. P-4, Q-2, R-5, S-3
 - B. P-5, Q-3, R-2, S-4
 - C. P-4, Q-3, R-2, S-1
 - D. P-5, Q-2, R-3, S-1

Question Type : **MCQ**

Question ID : **618074304**

Chosen Option : **B**

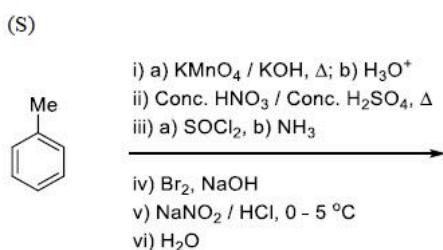

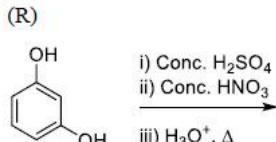

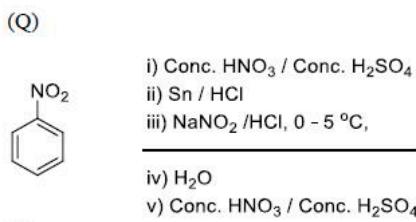

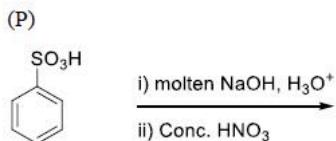

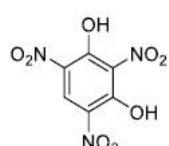

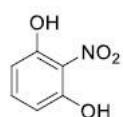

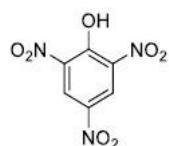

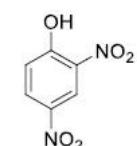

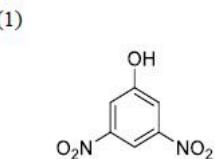

Q.2

SECTION 4 (Maximum Marks: 12)

- This section contains **FOUR (04)** Matching List Sets.
- Each set has **ONE** Multiple Choice Question.
- Each set has **TWO** lists: **List-I** and **List-II**.
- List-I** has **Four** entries (P), (Q), (R) and (S) and **List-II** has **Five** entries (1), (2), (3), (4) and (5).
- FOUR** options are given in each Multiple Choice Question based on **List-I** and **List-II** and **ONLY ONE** of these four options satisfies the condition asked in the Multiple Choice Question.
- Answer to each question will be evaluated according to the following marking scheme:
Full Marks : +3 **ONLY** if the option corresponding to the correct combination is chosen;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : -1 In all other cases.

List-I contains various reaction sequences and **List-II** contains different phenolic compounds.

Match each entry in **List-I** with the appropriate entry in **List-II** and choose the correct option.

List-I**List-II**

Options A. P-3, Q-2, R-5, S-4

B. P-2, Q-3, R-4, S-5

C. P-3, Q-5, R-4, S-1

D. P-2, Q-3, R-5, S-1

Question Type : MCQ

Question ID : 618074306

Chosen Option : D

Q.3

SECTION 4 (Maximum Marks: 12)

- This section contains **FOUR (04)** Matching List Sets.
- Each set has **ONE** Multiple Choice Question.
- Each set has **TWO** lists: **List-I** and **List-II**.
- List-I** has **Four** entries (P), (Q), (R) and (S) and **List-II** has **Five** entries (1), (2), (3), (4) and (5).
- FOUR** options are given in each Multiple Choice Question based on **List-I** and **List-II** and **ONLY ONE** of these four options satisfies the condition asked in the Multiple Choice Question.
- Answer to each question will be evaluated according to the following marking scheme:
Full Marks : +3 **ONLY** if the option corresponding to the correct combination is chosen;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : -1 In all other cases.

List-I contains various reaction sequences and **List-II** contains the possible products. Match each entry in **List-I** with the appropriate entry in **List-II** and choose the correct option.

List-I

(P)

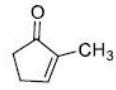

- i) O_3, Zn
 ii) aq. NaOH, Δ
 iii) ethylene glycol, PTSA
 iv) a) BH_3 , b) $\text{H}_2\text{O}_2, \text{NaOH}$
 v) H_3O^+
 vi) NaBH_4

(Q)

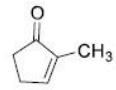

- i) O_3, Zn
 ii) aq. NaOH, Δ
 iii) ethylene glycol, PTSA
 iv) a) BH_3 , b) $\text{H}_2\text{O}_2, \text{NaOH}$
 v) H_3O^+
 vi) NaBH_4

(R)

- i) ethylene glycol, PTSA
 ii) a) $\text{Hg}(\text{OAc})_2, \text{H}_2\text{O}$, b) NaBH_4
 iii) H_3O^+
 iv) NaBH_4

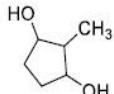

(S)

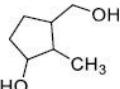

- i) ethylene glycol, PTSA
 ii) a) BH_3 , b) $\text{H}_2\text{O}_2, \text{NaOH}$
 iii) H_3O^+
 iv) NaBH_4

List-II

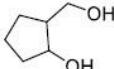

(1)

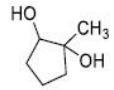

(2)

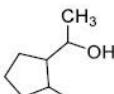

(3)

(4)

(5)

Options A. P-3, Q-2, R-4, S-1

B. P-5, Q-2, R-4, S-1

C. P-3, Q-5, R-4, S-1

D. P-3, Q-5, R-1, S-4

Question Type : MCQ

Question ID : 618074305

Chosen Option : C

Q.4

SECTION 4 (Maximum Marks: 12)

- This section contains **FOUR (04)** Matching List Sets.
 - Each set has **ONE** Multiple Choice Question.
 - Each set has **TWO** lists: **List-I** and **List-II**.
 - List-I** has **Four** entries (P), (Q), (R) and (S) and **List-II** has **Five** entries (1), (2), (3), (4) and (5).
 - FOUR** options are given in each Multiple Choice Question based on **List-I** and **List-II** and **ONLY ONE** of these four options satisfies the condition asked in the Multiple Choice Question.
 - Answer to each question will be evaluated according to the following marking scheme:
- Full Marks** : +3 **ONLY** if the option corresponding to the correct combination is chosen;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : -1 In all other cases.

In a conductometric titration, small volume of titrant of higher concentration is added stepwise to a larger volume of titrate of much lower concentration, and the conductance is measured after each addition.

The limiting ionic conductivity (Λ_0) values (in $\text{mS m}^2 \text{ mol}^{-1}$) for different ions in aqueous solutions are given below:

Ions	Ag^+	K^+	Na^+	H^+	NO_3^-	Cl^-	SO_4^{2-}	OH^-	CH_3COO^-
Λ_0	6.2	7.4	5.0	35.0	7.2	7.6	16.0	19.9	4.1

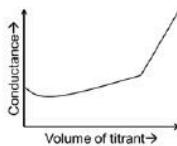

For different combinations of titrates and titrants given in **List-I**, the graphs of ‘conductance’ versus ‘volume of titrant’ are given in **List-II**.

Match each entry in **List-I** with the appropriate entry in **List-II** and choose the correct option.

List-I

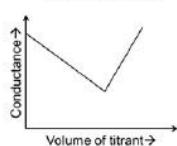

(P) Titrate: KCl
Titrant: AgNO_3

(1)

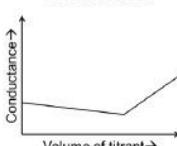

(Q) Titrate: AgNO_3
Titrant: KCl

(2)

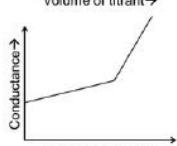

(R) Titrate: NaOH
Titrant: HCl

(3)

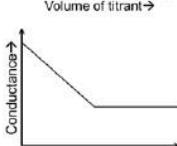

(S) Titrate: NaOH
Titrant: CH_3COOH

(4)

(5)

Options A. P-4, Q-3, R-2, S-1

B. P-2, Q-4, R-3, S-1

C. P-4, Q-3, R-2, S-5

D. P-3, Q-4, R-2, S-5

Question Type : MCQ

Question ID : 618074303

Chosen Option : --
